Experience

AI Product Manager @ BetterUp
05/2026 - 09/2026

- Founded and pitched Ambient Coaching, our team's core multi-quarter bet, to raise adoption and engagement via personalized coaching recommendations. Won 48 engineer-months (~$700K, 10% of H2 R&D budget) in CEO-approved funding.
- Built 2 MVEs with ML, eng and design to test initial ambient coaching hypotheses. Launched in alpha 08/17. Worked with the field team to secure our first beta partners for the initiative.
- Rebuilt our legacy MS Teams integration to unblock 3 of our largest deals. The rebuild grew monthly coaching-chats on MS Teams from 120 → 730, with a pipeline for 1000s more as key accounts came online.
- Became the field team's go-to PM for Microsoft Teams escalations on our largest accounts. Cleared BlackRock's infosec block with a code-level audit, negotiated Microsoft's 15 customization asks down to 3, and turned GE Vernova's top request into a funded project in 9 days.

Product Designer @ Cresta
01/2026 - 05/2026

- Designed the UX and interaction model for AI Analyst 2.0, an agentic analyst that turns hundreds of contact-center conversations into quantitative reports. Launched in August as the marquee feature of Insights 2.0, saving customers an estimated 12 million hours of manual call study work per year.
- Dug into usage data on our existing platform to prioritize the highest-value bets, aligned ML, backend, and design around that scope, and shipped an MVE to validate our hypotheses in two weeks.
- Pitched unifying the product's inconsistent filters, backed by $26M in Salesforce opportunity value tied to filter requests. Built prototypes, got design partner buy in and shipped updates in <1 month.

Product Consultant @ Hamming AI (YC S24)
12/2024 - 04/2025

- Built testing and analytics tools for AI voice agent evals as the first product hire at the company.
- Drove the Production Call Monitoring platform from concept to launch, establishing it as 1 of 3 core revenue offerings, helping close Cisco as a major enterprise customer and contributing to a 7-figure ARR pipeline.
- Led 10+ enterprise customer interviews to diagnose churn drivers, redesigned 4 core workflows to align with user mental models, improving retention & reducing support escalations.
- Facilitated cross-functional strategy alignment with 15 engineers, business stakeholders & investors on design system and IA redesign to clear 12+ months of UX debt and accelerate release velocity.

Product Manager @ CargaVia
08/2025 - 12/2025

- Spearheaded MVP scope for a bilingual LatAm logistics marketplace (SAM of 20K carriers, 5K shippers) as 1 of 3 founding team members, translating it into requirements and prototypes for 14 multi-sided workflows.
- Defined success, KPIs and our analytics framework, including event-level tracking across authentication, onboarding, and core workflows to enable funnel analysis and product measurement.

Product Manager @ WSIB Innovation Lab
09/2024 - 12/2024

- Led a 7-person team to build an AI product from discovery to MVP in 3 months, helping injured Ontarians access the right workplace accommodations and saving an estimated $900K/year in efficiency gains.

Education

Global Business and Digital Arts @ University of Waterloo

Bachelor of GBDA • 3.9 GPA

Skills

Product strategy, user research (interviews, surveys, product analytics), experiment design, GTM planning, analytics strategy, information architecture, wireframes & prototypes, AI prototyping, workshop facilitation, object-oriented UX

Tools

SQL, Python, Posthog, Mixpanel, Power BI, Figma, v0, Figma Make, Dovetail, BuildBetter, Jira, Linear, Asana, FigJam, Miro, Notion, Dropbox

Community

Volunteer: Designer & PM @ Extend A Family (via Blueprint), Team Lead & Volunteer Tutor @ United for Literacy, Volunteer Notetaker @ Student Accessibility Services

Advisor to Student Startups on topics of business strategy, pitching, and scaling
